### **Continental intros its compact CG55-65 Pro-SeriesII Dryer**

Oshkosh, Wis.— Continental Girbau Inc. just added a new, highly efficient compact 55 to 65-pound capacity drying tumbler to its Pro-Series II line-up. Now, Continental's Pro-Series II line includes tumblers in 20-30-, 30-40-, 55-65-, 50-60-, 75-85-, 115-125- and 165-175-pound capacities.

"At 34.5 inches wide, Continental's compact CG55-65 fits through a standard 36 inch doorway, takes up less space than most 50-pound tumblers on the market, and offers more drying capacity," said Joel Jorgensen, Continental vice president of sales and customer services. "Its smaller footprint and dimensions make it an appealing replacement machine for laundries looking to improve capacity and productivity per square foot."

All Pro-Series tumblers, including the CG55-65, feature a highly advanced Microprocessor Control system and unmatched energy-efficiency. The control offers up to four time-dry or auto-dry cycles and a no-heat cycle. An anti-wrinkle feature also reduces the occurrence of wrinkles by initiating an unheated airflow and tumble action after the end-of-cycle signal.

Several key features contribute to the advanced energy-efficiency of Pro-Series II Tumblers. They are designed with electronic ignition, which reduces drying time and conserves energy; a modular electrical system ensures reliability and easy servicing; and a multiple-burner heat system reaches desired temperatures quickly and efficiently. Moreover, the new CG55-65 features efficient axial airflow, a system that directs heated air through the basket. Lifting ribs inside the drum prevent tangling and keep heat energy constantly flowing through the load.

Conveniently accessible components contribute to the ease-of-use and maintenance of Pro-Series II Tumblers. An extra large door provides easy loading and unloading. The reinforced door bar allows quick access to laundry while simultaneously protecting the tumbler from outside impacts.

Continental's new CG55-65 tumbler is designed with the same durability as the rest of the Pro-Series II line. The tumblers feature dual motors with overload protection; steel front, side and top panels coated inside and out with electrostatically applied, baked-on paint, and numerous

other features contributing to increased linen and machine life. The CG55-65 and Pro-Series II Tumblers in 20-30-, 30-40-, 50-60- and 75-85-pound capacities also feature a stainless steel backplate for a gentler dry.

To find out more about the Pro-Series II CG55-65 tumbler or any of Continental laundry products, visit [www.continentalgirbau.com](http://www.continentalgirbau.com) or call 800-256-1073.

Continental Girbau, Inc. is the largest of nine company-owned subsidiaries of Girbau S.A., based in Vic, Spain. Girbau S.A. laundry products meet rigorous environmental and safety standards put forth by the International Organization for Standardization (ISO). The company, which holds both ISO9001 and ISO14001 certifications, markets industrial and commercial laundry products throughout 80 countries worldwide.
